The Choose Health project expands access to locally grown foods in ways that address food insecurity through an innovative partnership. Funded by Hunger-Free Minnesota, physicians from Lakewood Health System referred 51 families for a Community Supported Agriculture (CSA) membership. Families receive locally grown/raised commodities bi-monthly from “SPROUT MN” (a 5-county regional food hub of 40+ local growers).

The program includes an extensive in-take process of pre & post health care screenings from Lakewood, and nutrition education, cooking and preparation demonstrations, and recipes from the University of MN Extension, alongside a concentrated community referral process and ongoing support for food insecure individuals offered by Todd County Public Health. Additionally, cooking demonstrations are offered by local premier chefs from Prairie Bay restaurant with participants of the program receiving small food prep supplies for those in need.
