

Champion Report Template

Theme Area: Efficiency and Effectiveness

Champions: Andrea Lauer, Don Hickman, Anna Gruber, Justin Burslie and Melissa Radermacher

REPORTING PERIOD: March 17, 2015-June 16, 2015

Goals/Strategies or Action Steps:	What NEW success have you had in moving your theme goals forward over the reporting period?
	Addition of Justin Burslie, Planning & Zoning Specialist for NJPA, and the 8 City/Township P & Z Contracts he operates as well as side P & Z projects
	Not necessarily new, but Innovation Funding 2015 on June 10 th - the review of 8 new applications for Innovation Funding at Region Five, funding that promotes regional effectiveness, efficiency, and collaboration (\$350,000 for FY 2015 -2016).
	Todd/Wadena County Cities Collaboration Group held by Melissa and Anna, we had representation from 4 different Todd/Wadena Communities and discussed regional opportunities. The representatives found great value in the shared meeting and expressed their desire to have another one every 6 months or 1 year.
	Clerks from Pierz and Royalton provided assistance to the City of Upsala during the time their Clerk was ill. They did billing, council packets/minutes, and general office duties. The City of Royalton also provided assistance to the City of Rice when their Clerk resigned.
What future activities has your theme prioritized for the coming year?	
<p>Todd/Wadena County Cities Collaboration Meetings</p> <p>Wealth Works Coordination in to Innovation Funding (and other) projects</p>	

Note: several of the other Eff/Eff Recommendations & Action Steps are being forwarded by the other theme areas, ie housing, transportation.

Efficiency and Effectiveness

Efficiency and Effectiveness

Tighter resources; efficiency and effectiveness: Both public and private institutions are trying to do more with fewer resources. Solutions to our region's issues must be innovative, not dependent on increased spending from traditional sources.

Efficiency and Effectiveness Goal

Growth patterns: 12,000 new homes across the region from a population increase of 8% with an average household size of 2.4 persons. People retire here and want to live near amenities so there is moderate lake shore development. There is an increase in affordable housing and jobs so young people return. People live near jobs so big towns grow some and small towns hold steady.

Recommendation 1

Leverage roadway resources: Local government should dedicate funds for sustainable roadway projects that can leverage additional federal or state funds.

Action Step A

Jobs/roadways connection: Use data from the Regional Transportation Plan and relate it to the area's most likely to see job growth. Prioritize roadways in these areas for improvement as needed to accommodate expected growth.

Recommendation 2

Housing efficiency: Provide more efficient housing in the region in all areas where housing needs to be maintained by considering higher density infill development, or expanding when necessary.

Action Step A

Efficiency in development design: Adopt conservation design principles to more efficiently use infrastructure investments and other community resources.

Action Step B

Housing performance data: Log data of existing and future housing performance and make this information available.

Action Step C

Housing rehabilitation: Rehabilitate homes to suit a younger generation that

may look to occupy them. This could mean improving their efficiency.

Action Step D

Housing rehabilitation – energy efficiency: Any new or rehabilitated affordable rental/single family housing would be required to use appropriate green technologies to minimize heat and utility use.

Action Step E

Rental vouchers for energy efficiency: Provide energy efficiency vouchers for low

income renters as incentives for landlords receiving HUD vouchers.

Action Step F

Housing costs: Include life cycle energy costs and waste of retrofits into the housing cost equation.

Recommendation 3

Collaboration between local governments: Encourage partnerships between local governmental units and organizations that will lead to lowered costs and improved services, such as mass transit, police, fire, etc.

Action Step A

Regular discussion: Hold regular meetings with governmental units to share information, explore best practices, and provide an opportunity to explore potential partnerships; and stress the importance of civic engagement, and community volunteers, as the key mechanism to facilitating and prioritizing change.

Action Step B

Funding: Work with funders and other partners to provide seed money for more cost effective intergovernmental partnerships that maintain or improve services.

Recommendation 4

Cost of development: While the role of government includes providing infrastructure, local governments must provide infrastructure that meets strict, long-term financial criterion (i.e. full cost accounting). Communities must be assured that they will not be burdened with rising property taxes to cover infrastructure maintenance and replacement costs, or the costs to fix potential long-term environmental degradation.

Action Step A

Prioritize infill: Infill development, which is a relatively cost effective way to develop, should be a priority.

Action Step B

Brownfields: Brownfield redevelopment is a cost effective infill approach as the infrastructure is typically in place. Consider brownfield redevelopment as a first priority to infill and government financed development.

Action Step C

Best practices: Collect best practices and tools that will help local governments make good decisions regarding long-term development costs.

Action Step D

Policies and ordinances: Create policies and zoning ordinances that support accounting for all costs of development

Action Step E

Share information: Share information with local governments through workshops, emails and other new and existing venues.

Action Step F

Impacts on natural resources: Consider the impact on the environment for each decision made, especially in light of tighter resources. Don't compromise the integrity of the environment for short-term economic solutions that will adversely affect both the environment and the regional economy in the long term
